

HECTOR GENARO PACHECO

Software Engineer | Full-Stack • Backend & APIs • Cloud Infrastructure • Mobile Systems
Southern California • hector.genaro.pacheco@gmail.com • Portfolio • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Versatile Software Engineer with experience delivering standalone systems and collaborative contributions in shared codebases. Background spans full-stack web platforms, containerized cloud infrastructure on AWS ECS Fargate, type-safe REST/GraphQL APIs, relational database modeling (PostgreSQL/Prisma), native Android mobile apps (Kotlin/Jetpack Compose), embedded Linux daemons, and Jira/GitLab-driven team workflows with automated testing.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C++, Kotlin

Frontend & Mobile: React, Next.js 16, Android (Kotlin), Jetpack Compose, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express, REST APIs, GraphQL, FastAPI, Zod

AI & Platforms: Palantir Foundry, Palantir AIP, OpenAI API, RAG

Cloud & DevOps: AWS (ECS Fargate, ECR, RDS, Secrets Mgr), Docker, Linux, Git, GitLab, Jira, Vercel

Data & Databases: PostgreSQL, Prisma ORM, MongoDB, Supabase

Systems & Hardware: Raspberry Pi 5, gphoto2, systemd, GPIO, 4–20 mA, PLC

Quality & Testing: Vitest, Unit & Integration Testing, Automated Testing, Audit Logging

FEATURED SOFTWARE & SYSTEMS ENGINEERING PROJECTS

EstateOS — *Agentic Real Estate Investment Intelligence Platform* (Aug 2026 – Sep 2026) **CASE STUDY** [↗](#)
• Built a full-stack real-estate intelligence platform combining Claude-powered research and multi-agent orchestration with deterministic TypeScript underwriting.
• Implemented cash flow, cap rate, cash-on-cash return, LTV/CLTV, debt/equity analysis, multi-strategy screening, and evidence provenance/source-authority guardrails.
• Validated core logic, agent behavior, repositories, and integrations with 1,234 passing automated tests across 76 tracked Vitest suites, including PostgreSQL/Prisma integration coverage.

CalTrack — *Industrial Calibration SaaS & Mobile Platform* (Jun 2026 – Jul 2026) **LIVE APP** [↗](#) **GITHUB** [↗](#) **React • TypeScript • Node.js • Express • PostgreSQL • Docker • AWS ECS Fargate • Kotlin / Android**
• Architected and deployed a full-stack industrial calibration SaaS platform managing instrument tags, calibration logs, RBAC, and auditable history snapshots.
• Containerized Node/Express backend with Docker on AWS ECS Fargate, ECR, RDS PostgreSQL, Secrets Manager, KMS, and Vercel Edge.
• Engineered a native Android field companion application in Kotlin with Jetpack Compose, ViewModels, CameraX, and ML Kit barcode scanning.

Interactive Photo Booth System — *Client Hardware/Software Integration* **CASE STUDY** [↗](#) **Raspberry Pi 5 • Linux • Python • photobooth-app • gphoto2 • Canon DSLR • systemd**
• Built an event photo booth system for a nonprofit client, integrating Raspberry Pi 5, active cooling, an Acer 15.6" touchscreen, and tethered Canon DSLR.
• Automated camera capture via gphoto2 over USB PTP and configured systemd user services with kiosk startup scripts for reliable event operation.

Additional Repositories & Deployments: **Procurement Tracking** — Full-Stack GraphQL App (React/Apollo/Prisma/PostgreSQL) **LIVE APP** [↗](#) **GITHUB** [↗](#) • **FieldTrack AI** — Edge Telemetry (Raspberry Pi/Python/React) **GITHUB** [↗](#) • **OC Water Features** — Production Web (Next.js/Supabase/Vercel) **LIVE SITE** [↗](#)

TECHNICAL & INDUSTRIAL EXPERIENCE

Software Engineering Contributor — *Nonprofit serving underserved communities* **Collaborative Contribution**
• Contributed to an existing nonprofit software platform using Jira-based development workflows, Git/GitLab version control, API investigation, and collaborative debugging within a shared codebase.

Instrumentation & Controls Technician — *Process Control & Industrial Systems* **Field Engineering Experience**
• Calibrated, commissioned, and troubleshot 4–20 mA process instrumentation, PLC I/O wiring, relays, and field sensors across 480VAC, 120VAC, and 24VDC power systems with systematic fault isolation and auditable logs.

EDUCATION & PROFESSIONAL TRAINING

Western Governors University (WGU) — B.S. Software Engineering (In Progress, 2026–Present)
Palantir Technologies — Foundry & AIP Learning Credentials (May 2026)
Mirion Technologies — SU-890 iCAM Operations & Maintenance (March 2026, 16.00 Continued Education Credits)
